TITLE : POWDERY DETERGENT OF HIGH-SPECIFIC GRAVITY FOR CLOTHING

ABSTRACT : PURPOSE: To provide the title detergent which contains a salt of an  $\alpha$ -sulfo fatty acid ester, can prevent the hydrolysis of  $\alpha$ -SFE during storage, and has high detergency.

CONSTITUTION: The title detergent is obtained by mixing detergent particles (A) of a composition containing an  $\alpha$ -SFE as essential active constituent and scarcely any alkaline substance with detergent particles (B) of a composition containing an alkaline substance as essential constituent, which has a bulk specific gravity of  $0.5\text{g/cm}^3$  or higher, and in which the surfaces of the particles A and/or the particles B are coated with a nonionic surfactant and/or polyethylene glycol having a melting point of  $40\text{-}70^\circ\text{C}$ , and/or zeolite.
